

Ragnhild Bang Nes, psychologist/PhD, is a renowned happiness researcher in Norway and the lead on wellbeing at the Norwegian Institute of Public Health (NIPH). She also works as an adjunct professor at The Department of Psychology, University of Oslo (UiO). From August 2019, she has been heading the intervention research group at the PROMENTA Research Center at the UiO. Throughout her career, Ragnhild has been engaged in translating scientific knowledge into applicable utility. She has been awarded for her holistic approach, integrating knowledge from genetics to politics, and for shifting the focus from illness to health, from health to quality of life, and from the individual to the population. In 2017-2018, she led the work on a new measurement system of quality of life in Norway, intended as a steering tool for policy development and social progress. Her main research agenda focuses on wellbeing, mental and physical health, genetic and environmental influences. Ragnhild is also a clinical psychologist and has previously worked as a clinical neuropsychologist at Oslo University Hospital.
