

## TINNA LAUFEY ÁSGEIRSDÓTTIR, Ph.D.

Professor of Economics, University of Iceland

E-mail: [ta@hi.is](mailto:ta@hi.is)

---

Prof. Tinna Laufey Ásgeirsdóttir (Ph.D.) is the director and principal investigator of ConCIV (Consortium on Compensating Income Variation).

ConCIV focuses on researching the value of things that do not have a revealed market price but might nevertheless be very important for individual and societal wellbeing. Although difficult, valuing desiderata that do not have a clear market price is important to inform public policy. The ConCIV research group uses and further enhances the compensating income variation (CIV) method to estimate the sufficient monetary compensation needed to offset the wellbeing losses or gains associated with such desiderata. The Consortium includes scholars from many different countries and at various stages in their career, as well as institutional affiliates. Further information on ConCIV can be found at their website [conciv.hi.is](http://conciv.hi.is).

Prof. Ásgeirsdóttir's professional experiences involve teaching, research, and management of academic projects. She has held multiple editorial roles and is for example currently editor of the academic journal *Health Economics*. She has also served in many leadership roles within the academic community, such as being on the board of the University of Iceland (2008-2014 - elected by the academic community). She has additionally been involved in considerable governmental consultation, served on multiple boards, committees, and advisory panels. This includes leading Iceland's Cabinet committee on Icelandic competitiveness: Wellbeing, health, and equality (2009–2011). Prof. Ásgeirsdóttir has received multiple research grants from entities such as the National Science Foundation, The Icelandic Research Fund and NordForsk. She is involved in international collaboration across numerous countries and has, been a visiting scholar at various places, including The National Bureau of Economic Research (NBER), New York (2005-2006), KORA, Copenhagen (2013), and The University of California, Santa Barbara (UCSB) (2016–2017).

Prof. Ásgeirsdóttir has published a long list of scientific papers, book chapters, and books. For further information you are directed to her [Curriculum Vitae](#) at the University of Iceland.
